

IMPORTING DATA IN R

**readr**  
**read\_csv & read\_tsv**

# Overview

- Before: utils package
- Specific R packages
  - readr
  - data.table

# readr

- Hadley Wickham
- Fast, easy to use, consistent
- utils: verbose, slower

```
> install.packages("readr")  
> library(readr)
```

# CSV files

```
> read.csv("states.csv", stringsAsFactors = FALSE)
```

	state	capital	pop_mill	area_sqm
1	South Dakota	Pierre	0.853	77116
2	New York	Albany	19.746	54555
3	Oregon	Salem	3.970	98381
4	Vermont	Montpelier	0.627	9616
5	Hawaii	Honolulu	1.420	10931

```
> read_csv("states.csv")
```

```
# A tibble: 5 × 4
```

	state	capital	pop_mill	area_sqm

```

IMPORTING DATA IN R

**Let's practice!**

IMPORTING DATA IN R

**data.table: fread**

# data.table

- Matt Dowle & Arun Srinivasan
- Key metric: speed
- Data manipulation in R
- Function to import data: fread()

```
> install.packages("data.table")  
> library(data.table)
```

- Similar to read.table()

# fread()

 states.csv

```
state,capital,pop_mill,area_sqm
South Dakota,Pierre,0.853,77116
New York,Albany,19.746,54555
Oregon,Salem,3.970,98381
Vermont,Montpelier,0.627,9616
Hawaii,Honolulu,1.420,10931
```

```
> fread("states.csv")
```

	state	capital	pop_mill	area_sqm
1:	South Dakota	Pierre	0.853	77116
2:	New York	Albany	19.746	54555
3:	Oregon	Salem	3.970	98381
4:	Vermont	Montpelier	0.627	9616
5:	Hawaii	Honolulu	1.420	10931

 states2.csv

```
South Dakota,Pierre,0.853,77116
New York,Albany,19.746,54555
Oregon,Salem,3.970,98381
Vermont,Montpelier,0.627,9616
Hawaii,Honolulu,1.420,10931
```

```
> fread("states2.csv")
```

	V1	V2	V3	V4
1:	South Dakota	Pierre	0.853	77116
2:	New York	Albany	19.746	54555
3:	Oregon	Salem	3.970	98381
4:	Vermont	Montpelier	0.627	9616
5:	Hawaii	Honolulu	1.420	10931

# fread()

- Infer column types and separators
- It simply works
- Extremely fast
- Possible to specify numerous parameters
- Improved read.table()
- Fast, convenient, customizable

IMPORTING DATA IN R

**Let's practice!**
